

# ARTIFICIAL INTELLIGENCE, CHATGPT: WHAT CHALLENGES FOR EDUCATION?

## Online conference

In English or French, with  
slides in the other language

In education and learning communities, in schools and universities, ChatGPT raises questions. On the positive and negative – fantasized or real – consequences of this tool, on its potential, but also on its dangers (plagiarism, copyright infringement, disruption of learning methods and assessment tools for pupils and students).

**Wednesday March 22, 2023,  
4.30 pm**

The conference of the Association vaudoise des écoles privées (AVDEP) and the Swiss Group of International Schools (SGIS), which is aimed at education professionals, will give the floor to experts in the field of learning and new technologies.

### **Programme:**

#### **L'IA dans l'éducation : ChatGPT, et alors ?**

Prof. Francesco Mondada (EPFL), directeur du groupe de recherche MOBOTS et directeur académique du centre LEARN-EPFL et Grégory Liégeois, chef de projet, centre LEARN-EPFL

#### **How can AI tools such as ChatGPT support teaching and learning ?**

Matthew Roberts, BSc., PGCE, MA, Teacher of Geography (IB & Swiss Maturity), Collège de Champittet

#### **How to assess students' skills and knowledge in the age of ChatGPT?**

Aimée Skidmore, Language & Literature and Media & Communications Teacher, Collège du Léman

#### **Parades technologiques et humaines à "CheatGPT"**

Maxime Gabella, DPhil, CEO Magma Learning

#### **Q&A session with the audience**

Moderator: Anouch Seydtaghia, journalist at *Le Temps*

## **Free admission - registration required**

A link will be sent to you a few days prior to the conference.

The speakers of the Center for Learning Sciences of the EPFL would like to evaluate the participants' perceptions regarding ChatGPT, in order to better respond to the expectations of the audience. We therefore invite all participants to fill in the short anonymous online survey created for this event:
